Pengaruh Pelatihan Perawat Cilik Terhadap Pelaksanaan Program Usaha Kesehatan Sekolah di Sekolah Dasar Negeri 41 Pekanbaru

xiii + 40 halaman + 9 tabel + 3 skema + 8 Lampiran

ABSTRAK

Usaha kesehatan sekolah sebagai salah satu wahana untuk meningkatkan kemampuan hidup sehat dan derajat kesehatan peserta didik serta meciptakan lingkungan yang sehat, pelayanan kesehatan dan pembina lingkungan kehidupan sekolah yang sehat. Kegiatan Program Perawat kecil salah satu kegiatan untuk mengembangkan UKS di sekolah. Tujuan penelitian yaitu untuk mengetahui pengaruh pelatihan perawat cilik terhadap pelaksanaan program usaha kesehatan sekolah di Sekolah Dasar Negeri 41 Pekanbaru. Jenis penelitian ini adalah kuantitatif dengan desain *quasy experiment* dan rancangan *pre test and post test nonequivalent group.* Responden berjumlah 24 orang murid.Teknik sampling yaitu *stratified Random Sampling.* Penelitian dilakukan di Sekolah Dasar Negeri 41 Pekanaru pada bulan Juli 2022, dengan menggunakan instrumen kuesioner pelaksanaan program usaha kesehatan sekolah. Analisis yang digunakan adalah analisis univariat dan bivariat menggunakan uji *Paired T Test* dan *Independen T Test.* Hasil analisa univariat menunjukan mean *pretes*t dan *posttest* pada kelompok intervensi meningkat dari 8,67 menjadi 10,92 dan mean *pretest* dan *posttest* pada kelompok kontrol meningkat dari 8,75 menjad 9.00..Hasil analisa bivariat menunjukkan pada kelompok intervensi yaitu *p value* 0,000<0,005 yang artinya ada pengaruh pelatihan perawat cilik dengan pelaksanaan program usaha kesehatan sekolah di Sekolah Dasar Negeri 41 Pekanbaru. dan pada kelompok kontrol didapatkan *p value* 0,083>0,005 yang artinya tidak ada pengaruh pelaksanaan program usaha kesehatan sekolah tanpa pelatihan perawat cilik. Berdasarkan hasil penelitian ini diharapkan dapat dijadikan acuan dalam meningkatkan pelaksanaan program usaha kesehatan sekolah. Peneliti selanjutnya disarankan dapat dijadikan literature dalam melakukan penelitian selanjutnya tentang pelatihan perawat cilik terhadap pelaksanaan program usaha kesehatan sekolah disekolah dasar.

The Effect of Child Nurse Training on the Implementation of the School Health Business Program at 41 Pekanbaru State Elementary Schools

xiii + 40 pages + 8 tables + 3 schemes + 12 Appendixes

ABSTRAK

School health efforts as a vehicle to improve the ability to live healthy and the health status of students as well as create a healthy environment, health services and foster a healthy school life environment. The Little Nurse Program is one of the activities to develop UKS in schools. The purpose of the study was to determine the effect of child nurse training on the implementation of the school health business program at 41 Pekanbaru Elementary School. This type of research is quantitative with a quasi-experimental design and a non-equivalent group pre-test and post-test design. Respondents were 24 students. The sampling technique was Stratified Random Sampling. The research was conducted at the 41 Pekanaru Public Elementary School in July 2022, using a questionnaire instrument for the implementation of the school health business program. The analysis used is univariate and bivariate analysis using Paired T Test and Independent T Test. The results of the univariate analysis showed that the mean pretest and posttest in the intervention group increased from 8.67 to 10.92 and the mean pretest and posttest in the control group increased from 8.75 to 9.00. The results of the bivariate analysis showed that in the intervention group, the p value was 0.000 <0.005 which means that there is an effect of child nurse training with the implementation of the school health business program at the 41 Pekanbaru State Elementary School. and in the control group, a p value of 0.083>0.005 was obtained, which means that there is no effect on the implementation of the school health business program without child nurse training. Based on the results of this study, it is hoped that it can be used as a reference in improving the implementation of school health business programs. It is suggested that further researchers can be used as literature in conducting further research on child nurse training on the implementation of school health business programs in elementary schools.
