**Gambaran capaian imunisasi dasar pada masa pandemi Covid-19 di
seluruh puskesmas se Kota Pekanbaru**

X I+ 44 Halaman + 1 Skema + 9 Tabel + 6 Lampiran

ABSTRACT

Pandemic Covid-19 menyebabkan terjadinya banyak perubahan dalam berbagai aspek. Salah satu perubahan yang terjadi adalah adanya pembatasan aktivitas untuk meminimalkan penularan virus covid-19. Pembatasan aktivitas ini menyebabkan beberapa pelayanan kesehatan menjadi kurang efektif salah satunya di tiadakan nya posyandu di setiap daerah yang berdampak pada penurunan pelaksanaan imunisasi yang biasa dapat di lakukan di Posyandu. Jenis data sekunder dengan analisa univariat dengan desain deskriptif. Sample yang digunakan yaitu data imunisasi seluruh puskesmas yang ada di kota pekanbaru. Dari data hasil data univariat rata-rata capaian imunisasi di semua imunisasi mengalami penurunan. di karena efek dari pandemic yang terjadi pada saat itu. pemerintah Indonesia telah mengambil sejumlah langkah dalam upaya pencegahan dan pengendalian Covid-19 serta meningkatkan kapasitas sitem kesehatan dalam situasi pandemic saat ini. Dengan begitu pemerintah mengadakan gerakan Badan Imunisasi Anak Nasional untuk mengejar imunisasi yang tertinggal 2 tahun yang lalu.

**Overview of basic immunization achievements during the Covid-19 Pandemic
In all health centers in Pekanbaru City**

XI + 44 Page + 1 Scheme + 9 Table + 6 Attachment

ABSTRACT

The Covid-19 pandemic has caused many changes in various aspects. one of the changes that occurred was the restriction of activities to initiate the transmission of the Covid-19 virus. The limitation of this activity causes some health services to be less effective, one of which is the elimination of posyandu in each area which has an impact on the general implementation of general public service that can be carried out at posyandu. The type of secondary data is univariate analysis with a descriptive design. Is in the city of Pekanbaru and data from the univariate data on the average achievement of immunization and all immunizations has decreased due to the effects of the pandemic that occurred at the time, the Indonesian government has taken a number of steps in efforts to prevent and control Covid-19 as well as increase the capacity of the health system in a pandemic situation at the moment. The way the government held a national child immunization agency movement to catch up on immunizations that were left behind two years ago
