Analisis Pencapaian Imunisasi Dasar Lengkap Di Puskesmas Bangkinang Kota
Kabupaten Kampar

1x + 95 Halaman + 7 Tabel + 4 Lampiran

ABSTRAK

Berdasarkan data profil Dinas Kesehatan Kabupaten Kampar tahun 2020 yang menyatakan Puskesmas Bangkinang Kota salah satu puskesmas dengan cakupan imunisasi dasar terendah di Kabupaten Kampar dengan cakupan hanya 7,1%. Penelitian bertujuan untuk menganalisis pencapaian imunisasi dasar lengkap di Puskesmas Bangkinang Kota Kabupaten Kampar. Penelitian menggunakan metode kualitatif dengan pendekatan deskriptif. Dalam penelitian penulis mengumpulkan data dengan cara melakukan wawancara mendalam kepada 18 orang informan. Dari hasil penelitian yang dilakukan tentang analisis pencapaian imunisasi dasar lengkap di Puskesmas Bangkinang Kota Kabupaten Kampar, bahwa pelaksanaan kegiatan imunisasi dasar di Puskesmas Bangkinang Kota secara umum sudah terlaksana berdasarkan petunjuk teknis pelaksanaan imunisasi, namun dalam pelaksanaannya terdapat berbagai kendala seperti keterbatasan sumber daya manusia dan pelaksanaan monitoring dan evaluasi yang belum berjalan maksimal. Disarankan kepada pihak Puskesmas untuk dapat melakukan kegiatan monitoring dan evaluasi terkait pelaksanaan imunisasi di Puskesmas Bangkinang Kota.

Analysis of Complete Basic Immunization Achievement at Puskesmas Bangkinang Kota, Kampar Regency City

ABSTRACT

Based on the profile data of the Kampar District Health Office in 2020 which states that the Bangkinang City Health Center is one of the health centers with the lowest basic immunization coverage in Kampar Regency with a coverage of only 7.1%. This study aims to analyze the achievement of complete basic immunization at the Bangkinang Health Center, Kampar Regency. The study used qualitative methods with a descriptive approach. In this study the authors collected data by conducting in-depth interviews with 18 informants. From the results of research conducted on the analysis of the achievement of complete basic immunization at the Bangkinang City Health Center, Kampar Regency, that the implementation of basic immunization activities at the Bangkinang City Health Center in general has been carried out based on technical instructions for immunization implementation, but in its implementation there are various obstacles such as limited human resources and implementation monitoring and evaluation that has not run optimally. It is recommended to the Puskesmas to be able to carry out monitoring and evaluation activities related to the implementation of immunization at the Bangkinong City Health Center.
