ABSTRAK

Proses keperawatan merupakan gambaran dari hubungan antara pasien dan perawat, identitas dan peran profesionalitas perawat dan pengembangan pengetahuan perawat. Tujuan untuk mengetahui distribusi frekuensi persepsi mahasiswa dalam menyusun asuhan keperawatan di S1 Keperawatan Institut Kesehatan Payung Negeri Pekanbaru. Penelitian ini merupakan penelitian kuantitatif dengan desain penelitian yang digunakan adalah desain korelasi dengan menggunakan pendekatan studi *cross sectional*. Populasi dalam penelitian ini adalah seluruh mahasiswa di program studi S1 Keperawatan. Hasil uji statistik *chi square* diperoleh *p value* $0,640 > \alpha (0,05)$ dapat disimpulkan tidak ada pengaruh antara umur dengan penerapan *mapping care plan*, hasil uji statistik *chi square* diperoleh *p value* $0,000 < \alpha (0,05)$ dapat disimpulkan ada pengaruh antara jenis kelamin dengan penerapan *mapping care plan*, hasil uji statistik *chi square* diperoleh *p value* $0,000 < \alpha (0,05)$ dapat disimpulkan ada pengaruh antara tingkat dengan penerapan *mapping care plan*, hasil uji statistik *chi square* diperoleh *p value* $0,000 < \alpha (0,05)$ dapat disimpulkan Hipotesis nol (H_0) ditolak hasil ini menunjukkan ada pengaruh ada antara penerapan *mapping care plan* Terhadap Persepsi Mahasiswa Dalam Penyusunan Askep Rekomendasi: Peneliti menyarankan kepada Institut Kesehatan Payung Negeri Pekanbaru agar bisa sebagai bahan masukan dan peningkatan pengetahuan dan perkembangan ilmu bagi mahasiswa.

Kata kunci : *Mapping Care Plan*, Persepsi, Asuhan Keperawatan

The Influence of Implementing the Mapping Plan Care on Student Perception in Preparing nursing Faculty The Bachelor of Nursing at the Payung Negeri Pekanbaru Health Institute

xiii + 52 Pages + 14 Tables + 1 Scheme + 10 Attachments

ABSTRACT

The nursing process is a description of the relationship between patient and nursing, the identity and professional role of nurses, and the development of nurse knowledge. The aim is to determine the frequency distribution of students' perceptions in arranging nursing care at the Bachelor of Nursing at the Payung Negeri Pekanbaru Health Institute. This research is a quantitative study with the research design used is a correlation design using a cross sectional study approach. The population in this study were all students in the Bachelor of Nursing Study Program. The results of the chi square statistical test obtained p value of $0,640 > \alpha (0,05)$ it can be concluded that there is no influence between age and implementation of the mapping care plan, the results of the chi square statistical test obtained p value of $0,000 < \alpha (0,05)$ it can be concluded that there is an influence between level and the mapping care plan, the results of the chi square statistical test obtained p value $0,000 < \alpha (0,05)$ it can be concluded that the null hypothesis (H_0) is rejected. This result shows that there is an influence of the implementation of the mapping care plan on student perceptions in preparing medical procedures in the Nursing Study Program at the Pekanbaru State Payung Negeri Health Institute. Recommendation: Researchers suggest the Pekanbaru State Nursing Health Institute can be input material and increasing knowledge and development of science for readers (Pustaka) Payung Negeri Pekanbaru Health Institute and can be a reference source for readers regarding the implementation of Mapping Care Plan on student perceptions in preparing Nursing Care for students in higher education.
